

Storage Tank Usage:

1000L Tank	1500L Tank	2000L Tank	2500L Tank	3000L Tank	3500L Tank	4000L Tank
3	4.5	6	7.5	9	10.5	12

Amounts are for Litres of Actioil to be used by Volume of tank. 1 treatment will last 3 years.

Equipment Tank Usage:

50L	100L Tank	150L Tank	200L Tank	300L Tank	400L Tank	500L Tank
0.5	1	1.5	2	3	4	5

Amounts are for Litres of Actioil to be used by Volume of tank. 1 treatment will last 1 year, 500 hours or 125,000km, which ever comes first.

Cold Weather Usage:

Temperature	200L Tank	400L Tank	600L Tank	800L Tank	1000L Tank	1500L Tank
-24 C	0.4	0.8	1.2	1.6	2	3
-28 C	0.8	1.6	2.4	3.6	4	6

Amounts are for Litres of Actioil to be used by Volume of tank. 1 treatment to be put in tank before filling.

Approved and Used in Europe by the following Equipment Manufacturers:

VOLVO TRUCK

Eneria 

OMNIplus

Services pour votre Mercedes-Benz et Setra

VOLVO CE

Q) What is Actioil?

A) Actioil is a complete diesel fuel treatment that prevents and solves problems of moisture, gelling and bacteria and fungus build up.

Q) Do I have to put Actioil in every time I fill my fuel tank?

A) No, a protective coat remains on the tank.

Q) How much do I need to use?

A) Storage Tank : 3L per 1000L, 1 Treatment = 3 Years Protection

Equipment Tank : 1L per 100L, 1 Treatment = 1 Year protection (500hrs/125,000km)

Q) How empty does my fuel tank have to be before putting in the Actioil?

A) Less than a third full. Once the tank is filled Actioil starts working immediately.

Q) How did the water and bacteria get into my tank in the first place?

A) The reduction of sulphur levels, increase in vegetable oils and change in fuel temperature all contribute to water (condensation) and bacteria forming.

Q) Does it kill and remove the water, bacteria and fungi?

A) Yes, Actioil has 9 groups of chemicals to treat 22 different issues.

Q) Will the filters get clogged?

A) No, it makes tiny (nano) particles of the contamination, suspends them in the diesel and they are removed harmlessly as you use the fuel.

Q) Will it damage the fuel pump and injectors

A) No, it will enhance them by cleaning the contaminant residues.

Q) Will this not cost me a fortune?

A) No, it will cost less than a cent per litre of fuel. Easily saved in reduced maintenance costs and fuel efficiency.

Q) Will it help me in cold weather like last winter?

A) Yes, use up to 4 litres of Actioil per 1000 litres to protect against gelling and fuel crystallisation for additional protection down to -28°C.

Q) Is it a treatment or an additive?

A) It is a treatment not to be confused with cheaper additives.

Q) Does it matter if the tank is made of plastic or steel?

A) No it doesn't matter what the tank is made from.

Q) Do I have to treat both my storage and vehicle tank?

A) Yes you do, the Actioil in the storage tank isn't sufficient to protect both.

Q) I have a quick turnover of fuel in my storage tank and vehicles with no apparent problems, should I use Actioil?

A) Yes, Actioil can be used as a preventative measure not just a cure to problems.
