

## **TECHNICAL INFORMATION SHEET**

### **TRIPLE PLUS**

### **TRAFFIC FILM REMOVER WITH RINSE AID**

#### **DESCRIPTION**

A high active Traffic Film Remover containing a synergistic blend of surface-active agents, emulsifier, sequestering agents and alkali builders. Contains a Rinse Aid for improved finish.

#### **APPLICATION**

For the exterior cleaning of commercial vehicles. Removes traffic film, oil and grease. Ideal for chassis cleaning. Product is normally applied with a high pressure cleaner.

#### **METHOD OF USE**

For vehicle body washing, the detergent control of the machine should be adjusted to give the desired cleaning effect. This is normally between 1.5% and 4%, but may be adjusted according to the type of machine, extent of soiling, and other working conditions. Apply the solution from the bottom of the vehicle and working upwards. If a hot water pressure cleaner is used, optimum performance is achieved at a temperature of 40<sup>0</sup> C. Extra care should be taken when washing in strong sunlight. Check the surface temperature, and if it feels hot to the touch, then cool down with water before applying the solution. Do not allow the solution to dry out on the vehicle. After a suitable contact time, rinse thoroughly with high pressure water. For best results, dry all glass with a squeegee or leather after cleaning. For engine and chassis cleaning, use at 1.5% through a hot water pressure cleaner at 75<sup>0</sup> to 85<sup>0</sup> C.

#### **TYPICAL CHARACTERISTICS**

Appearance	-	Yellow coloured liquid
pH (10 g/l)	-	9.5 to 10.0
Density	-	1.058 @ 20 <sup>0</sup> C
Active content	-	Approximately 22%

#### **HEALTH AND SAFETY INFORMATION**

This product is non-toxic and not classified as a harmful substance. Contact with eyes and skin should be avoided. In the event of skin contact, wash thoroughly with water. For eyes, rinse immediately and seek medical advice.

This product complies with European environmental requirements. Spillages should be washed away with water to prevent a hazardous slippery surface.

For further information, please refer to our safety data sheet.
