#### **Exposure controls** 8.2. Engineering measure(s) : Provide adequate ventilation. Organisational measures to prevent/limit releases, dispersion and exposure. See Section 7 for information on safe handling . Personal protective equipment : The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace. Hand protection : Wear chemically resistant gloves (tested to EN374) . Suitable material: Neoprene. Nitrile rubber. Breakthrough time : >8h. Thickness : >0,3mm. The quality of the protective gloves resistant to chemicals must be chosen as a function of the specific working place concentration and quantity of hazardous substances. : tightly fitting safety goggles (EN 166). During splash contact: face shield (EN 166) Eye protection : Wear suitable protective clothing.
