#### **APPLICATIONS**

Dynatrans MPV has been especially developed for transmissions with wet brakes requiring an API GL-4 lubricant with a 10W-30 or 80W viscosity grade, in both Off-Road and On-Road vehicles.

This lubricant is also perfectly adapted to automatic transmissions, torque converters and hydrostatic transmissions and more generally to any transmissions requiring an UTTO (Universal Tractor Transmissions Oil) lubricant.

Dynatrans MPV is also designed to lubricate hydraulic systems, power-assisted steering and power-take-offs (PTO) with wet clutches.

#### PERFORMANCES & CUSTOMERS BENEFITS

- Dynatrans MPV is adapted to a wide range of agricultural and Public Works equipment and helps to reduce the stock and the number of lubricants.
- This lubricants shows excellent low temperature performances (protects friction brakes against sticking) and high temperature performances (protects against judder or excessive slip).
- Dynatrans MPV has very good extreme pressure and anti-wear properties giving optimum protection of gears and hydraulic components.
